

ABOUT US

Success Can Be Elusive

- ❖ Strategy, people and processes... Putting these pieces together with technology requires skilled technical understanding and business know-how. Assemble the puzzle incorrectly and you lack focus. Correctly assembled, these pieces lead to clarity, understanding and ultimately business success.
- ❖ Simply put, that's what Solid Logic is all about. As a strategic IT consulting firm, we provide solutions that help you recognize, analyze and act upon critical insights into your business. We help you put the right piece into the right place at the right time to ensure success.
- ❖ We have already helped some of Minnesota's best know-- including Fortune 500 -- companies successfully piece their picture together.

Solid Logic is the logical choice

- ❖ Founded in 1992, Solid Logic is a strategic information technology consulting firm specializing in corporate performance management solutions and business intelligence/data warehouse services. Building on our successes, we have become one of the Midwest's premier consulting organizations -- helping clients achieve and sustain competitive advantage through the use and management of technology.
- ❖ Our team of dedicated and knowledgeable consulting professionals average over 12 years of business management and technology experience. This unique blend of business and technical expertise allows us to offer the perspective and insight that leads to innovative yet pragmatic solutions--solutions that directly impact our clients' operations.

Why Choose Solid Logic?
